# WE'RE HIRING A FULL STACK DEVELOPER
BE PART OF A FUTURE-FOCUSED COMPANY REDEFINING AN ENTIRE SECTOR

ABOUT DEEPMATTER

DeepMatter® aims to revolutionise chemistry through its integration with technology to enable a greater use of artificial intelligence and ultimately facilitate the autonomous synthesis of new molecules through robotics. Sitting at the heart of this is data. The increasing digitalisation of the life science and chemistry markets means organisations are collecting more data, requiring confidence in that data and wishing to create value from that data.

DeepMatter has developed and is commercialising data rich platform technologies, including software integrated with laboratory hardware, with the ability to collect ubiquitous and novel data, clean up and structure the data whatever the source, and apply machine learning analysis to enable actionable knowledge – thereby increasing productivity, discovery and compliance gains.

We are a vibrant, high-growth technology company with our officed based in Glasgow, Munich and many employees remote across Europe.

THE ROLE

We are looking for a talented, enthusiastic full stack developer with strong front-end skills to enhance the team and work across our cloud native and edge platforms.

Preferred location Glasgow. Remote working (within the UK) will be considered.

KEY RESPONSIBILITIES

- Develop an application with Java (back-end) and React (front-end).
- Contribute to development in other areas, e.g., Kotlin/Android, SQL/NoSQL databases, Google Cloud Platform.
- Work to improve agile practices, testing, planning, and reporting of software development.
- As a core member of our agile, cross-functional team, you will contribute across the lifecycle from story mapping to test and deployment.

REQUIRED SKILLS & EXPERIENCE

- 4+ years' experience building web-based applications with Java (ideally Java 8+)
- Strong experience with JavaScript and React or similar.
- Willingness to work across the full stack.
- Passionate about writing clean, well-tested, and robust code.
- Knowledge of modern data storage technologies and techniques (SQL and NoSQL).
- Experience working in an agile development environment.
- Experience with Continuous Integration / Continuous Delivery.

PREFERRED SKILLS & EXPERIENCE

- Building, deploying Restful web-services, especially on the public cloud (AWS, Azure or GCP).
- Atlassian toolset, JIRA, Confluence, Bitbucket.
- Significant experience with the Spring platform (ideally SpringBoot).

COMPANY BENEFITS

- Generous holiday allowance
- Choice of Mac or PC
- Flexible working – work when you want, where you want with our 'core-hours' scheme
- Flexible on location, with travel to our offices (Glasgow, Munich)
- Generous Refer a friend scheme
- Enhanced parental leave
- Tax advantageous schemes such as gym/equipment reimbursements (wellness subsidy scheme)
- Business travel insurance
- Company outings, off-sites and events throughout the year
- Complimentary snacks and drink in our offices (you can enjoy these on our roof terrace in our sunny Glasgow office!)
