

UX / UI Designer, Glasgow

About Us

We are a small cross-functional team of product managers, data scientists, hardware and software engineers developing a truly unique capability to digitise the world of chemistry. We have an ambitious roadmap of features across multiple products that we will be deploying to our worldwide user base.

The Role

We are looking for a talented, enthusiastic, and UX / UI Designer to help us shape how people experience our products.

Preferred location Glasgow. Remote working (within the UK) will be considered.

Key Responsibilities

- Develop user interface designs, wireframes, and interactive prototypes.
- Design for users of data rich, complex data products.
- Collaborate with cross-functional to develop functional and user-centred products.
- Manage project priorities, deadlines, and deliverables.
- Identify UX issues and develop UX recommendations.
- Build a design system and pattern library to support company products.

Key Skills & Experience

- Bachelor's degree in Design or equivalent practical experience.
- At least 2 years' experience with web, mobile and UX/UI design.
- Clear understanding of UX methodologies.
- Experience in designing B2B web applications for technical domains.
- Experience with prototyping tools such as Figma, Adobe XD, Sketch, Axure or similar.
- Experience working collaboratively with product managers and developers in an agile environment.
- Analytical and problem-solving skills.

Also preferred

- HTML, CSS and JavaScript.
- German language skills are desirable.

Salary and Benefits

- Competitive salary
- 25 days annual leave

deepmatter™

- 11 public holidays
- 4% employer pension contribution
