

Full Stack Developer, Munich

About Us

We are a small cross-functional team of product managers, data scientists, hardware and software engineers developing a truly unique capability to digitise the world of chemistry. We have an ambitious roadmap of features and capabilities that we will be deploying to our worldwide user base and are looking for a Full Stack Developer to join our development team in Munich.

The Role

We are looking for a talented, enthusiastic full stack developer with strong front-end skills to enhance the team and work across our cloud native and edge platforms.

Preferred location Munich. Remote working (within Germany) will be considered.

Key Responsibilities

- Develop applications with Java (back-end) and React (front-end).
- Translate complex features into modern, clean, and maintainable code.
- Review code developed by other team members.
- Contribute across the lifecycle from story mapping to test and deployment.
- Work to improve agile practices, testing, planning, and reporting of software development.
- Be prepared to work across a product set, at times utilising different technologies.

Key Skills & Experience

- 3+ years' experience building web-based applications with Java (Java 8+)
- Strong experience with the Spring platform (ideally SpringBoot).
- Experience with JavaScript frameworks (React, Backbone.js).
- Strong experience developing Web Services and REST APIs.
- Knowledge of modern data storage technologies and techniques (SQL and NoSQL).
- Passionate about writing clean, well-tested, and robust code.
- Experience working in an agile development environment.
- Experience with Continuous Integration / Continuous Delivery.

Also preferred

- Atlassian toolset, JIRA, Confluence, Bitbucket.
- German speaker

Salary and Benefits

- Competitive salary.
- 28 days annual leave plus public holidays in line with Munich.
- Annual incentive scheme.
